Software Engineer & Full-stack web developer

Passionate about computer science, self-taught and highly motivated. Fast learner, seeking knowledge and constant improvement in the field.

Actively building and maintaining projects which include games, full-stack applications, desktop applications that can be found in my [Github account](#).

Strong understanding of programming best practices to write clean and efficient code. I consider myself as a team player with excellent interpersonal skills.

Key competencies include:

- Programming languages - C, C++, Go, Python, JavaScript, TypeScript and SQL
- Security - Authentication, OAuth2, SSL/TLS
- Web Development - Node.js, Flask, React.js, Express.js
- Microservices development with Docker
- Databases - MongoDB, PostgreSQL, SQLite
- Cyber security - Penetration testing with Python

I welcome you to take a look at some of my projects on my [website](#).

Professional Development
